

LUIS MARTINS

// ABOUT ME

I'm a full-stack software engineer and creative problem solver combining my ability to build responsive web applications with my experience designing and engineering complex system solutions. I want to be involved in projects where I am challenged, join an amazing team, and advance my development career.

// PROFESSIONAL EXPERIENCE

The Corcoran Group

New York, NY

Software Engineer

Aug 2016 - Present

Drove the development of numerous web applications utilizing frameworks such as React, Angular 2, and AngularJS. Designed and developed Corcoran's new internal search tool, introducing features such as saved searches and a new map tool, which offered agents the ability to refine their searches on a client level and search for listings within custom drawn areas. Introduced and standardized modern web technologies (React, Webpack) to a legacy team/code. Developed the company's first native application in React Native, which served as a tool that enabled agents to better track active listings across all offices. Led hiring efforts that resulted in the addition of 15+ engineers to the team.

Rehash Studio

Brooklyn, NY

Software Engineer

Jan 2016 - Aug 2016

Worked with a small team to develop a number of web applications primarily utilizing the MEAN stack. Projects ranged from a real estate listing publisher to a dropbox-hosted streaming service.

Frazier Industrial Company

Long Valley, NJ

Design Engineer

Mar 2013 - July 2015

Responsible for project design, engineering, and implementation of automated material handling systems on over 50 projects valued over \$1M. Constructed visual data tools for the client with the goal of making bids more digestible. Served as the focal point of communication between manufacturing, sales, and the client. Analyzed market and customer trends to strategically determine the highest attainable profit margins increasing margin by 30% on most projects.
